Schneller's New AerFusion via[™] is your Path to the Ultimate All-in-One Flooring

Kent, Ohio, USA – Schneller LLC, is pleased to introduce AerFusion via, the latest non-textile flooring fully qualified at Airbus. Schneller's AerFusion via is an innovative all-in-one continuous flooring combining a protected, slip resistant decorative layer with a structural reinforcing composite backing in one product.

AerFusion via is an evolution of Schneller's successful AerFusion product, providing a "path" to enhanced design differentiation and streamlined logistics through:

- Brand Identity *by way of* custom colors, prints, metallics and pearls
- Streamlined logistics *by way of* AerFusion via's lightweight, all-in-one construction
- Cost-effective *by way of* shorter lead times, smaller lot sizes, enhanced durability, and roll form availability.
- Efficiency *by way of* custom fabrication – including seaming and cut-to-size
- Differentiation *by way of* varied texture options

From the first AerMat product introduced in 1964 to AerFusion via launched at the Aircraft Interiors Expo 2009 in Hamburg, Germany; Schneller has a 45 year history providing new and innovative flooring products to the aviation industry. Director of Marketing and Business Development, Diane Geisler, proclaims "AerFusion via represents the ultimate in flooring technology – complete design flexibility through custom prints, metallics, and textures with the efficiency of an all-in-one construction".

Schneller is a global leader in the development and production of engineered decorative laminates and non-textile flooring for the transportation and architectural industries. Schneller provides custom design and color matching, material selection, continuous roll and sheet production from its ISO-9001 certified production facilities in Kent, Ohio and Pinellas Park, Florida with global sales and service support from its Paris, France facility. For more information, visit the company's website at www.schneller.com.
