**New Flooring Technology and Design in Hong Kong**

**Kent, Ohio, USA** – Schneller LLC, a leading manufacturer of non-textile flooring for aircraft interiors, is planning a very comprehensive showing of new products in Stand 11B01 at the Aircraft Interiors Expo Asia in Hong Kong, September 3-6, 2007. Leading the list of product introductions is the revolutionary [AerFusion™ all-in-one floor covering](#). By fusing a decorative, non-slip surface with a structural, reinforcing, composite backing, AerFusion™ offers advantages in weight and cost. This high-performing, customizable flooring is available in an extensive range of colors, textures and prints.

Schneller is also featuring [PanFlor™ True-to-Nature™](#) designs in Hong Kong. In tune with contemporary trends in aviation interiors that are inspired by the natural world, Schneller has selected a series of exquisite woodgrain and stone patterns. True-to-Nature™ designs take advantage of the latest imaging and printing technologies. Rich and deep woodgrains, classic marbles, bamboo and cork patterning will help create warm, welcoming environments.

PanFlor™ engineering ensures excellent dimensional stability, durability, and resistance to staining and abrasion.

To help designers navigate through its extensive selection of NTF, Schneller has created the new [Flooring Design Gallery](#). Easily accessed at [www.schneller.com](http://www.schneller.com), the Flooring Design Gallery allows visitors to see the entire range of AerFusion™, AerMat™ and PanFlor™, and to narrow down their selections with just a few clicks.

*Schneller is a global leader in the development and production of engineered decorative laminates and non-textile flooring for the transportation and architectural industries. Schneller provides custom design and color matching, material selection, continuous roll and sheet production from its ISO-9001 certified production facilities in Kent, Ohio and Pinellas Park, Florida with global sales and service support from its Paris, France facility. For more information, visit the company's website at [www.schneller.com](http://www.schneller.com).*
