Schneller Lean Process Receives Leadership Award

Kent, Ohio, USA – Schneller, Inc., a global leader in engineered decorative materials for aviation and rail car interior design, was recently honored with the presentation of a Quality Service Leadership Award for streamlining its business process and standards. Schneller was one of five companies recognized at the 10th Annual Business Leadership Awards ceremony, held in Cleveland, Ohio, May 11, 2006.

This event is sponsored by a consortium of business organizations and consultants, headed up by the Rotary Club of Cleveland and the Nance College of Business at Cleveland State University. The group established the awards program based on global business standards, screened candidates, and selected winners who demonstrated a wide range of skills and the commitment to excellence by management and all employees.

The Quality Service Leadership Award recognized Schneller’s smooth transition to lean process throughout its manufacturing, service and office operations. Today, Schneller is experiencing enterprise-wide results in quality management, cost reduction and continuous improvement.

“We’ve made raising the bar every day a way of life in our business,” said Richard C. Organ, president and chief executive officer, “and we’re seeing it resonate well with our customers. We’re able to meet, and often exceed, their expectations at every point in our relationships, from consultation to design concepts to product development and delivery.”

Schneller serves a wide range of customers worldwide in aviation, rail, and architectural interior decor, providing custom design, color matching, materials selection, and continuous roll and sheet production from its ISO 9001-certified facilities. Products delivered include customized decorative laminates for interior walls, seating, counters and cabinets, and non-textile floor coverings.

Headquartered in Kent, Ohio, USA, Schneller also has major facilities in Pinellas Park, Florida; Paris, France; and a brand new full-service, global sales and service center in Singapore. For more information, please visit: www.schneller.com
